

## **AIU High School a new OCWC's member!**

### **Did you know that education is the key to achieve a better quality of life?**

Since the last century, people around the world have been trying to improve the online educational content. Actually, we can find a lot of websites online which contain essays, summaries, thesis, etc. However, when we speak about a high quality educational content online, we are talking about educational content generated by universities, colleges and high schools that are well recognized for their path and their ability to create entrepreneurs and leaders.

This wonderful movement is recognized around the world as "Open Course Ware" (OCWC). The OCWC is made up of universities, colleges and prestigious high schools. All the OCWC members believe that education is very important for our development as human beings. The OCWC members agree that a high quality educational content should be online, allowing students around the world to access more information and efficiently substantiate their research.

AIU High School shares this feeling and has decided to become an OCWC member because we believe in a better world and we are sure that education is the best way to have success in our lives. In order to become an OCWC member, we went through a difficult selection process and due to our motivation and will to succeed, we were consequently accepted.

Dear students, if you didn't know about the high quality education content online, now you know it!, you can access this content online at: <http://www.ocwconsortium.org>

### **Do you think that the OCWC will help to improve education worldwide?**
